

CAT SAFE KAUA'I

We ♥ cats and we know you do too.
The best way to look after your cat is to keep them indoors. They will live longer and you'll likely spend less on vet bills.

INDOOR CATS ARE PROTECTED FROM:

- ✓ car accidents
- ✓ diseases and parasites
- ✓ fighting with other animals
- ✓ getting lost

Koloa Maoli

Kaua'i's endangered waterbirds and seabirds appreciate indoor cats too. There are less than 1,000 Koloa Maoli (Hawaiian Duck) in the world and the majority live here on Kaua'i.

'U'au

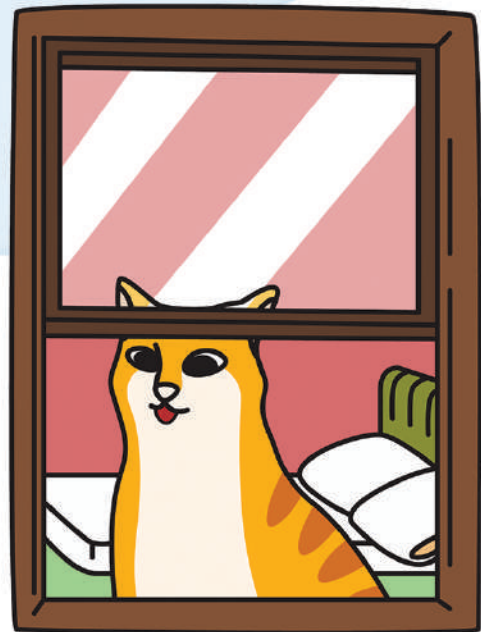

Indoor cats are also safe from toxoplasmosis, which can spread to our communities and even endangered Hawaiian Monk Seals.

CATS ARE SAFER INSIDE
JOIN THE INDOOR CAT CLUB TO PROTECT YOURS!

RAISING HAPPY HEALTHY *Cats*

Almost two thirds of cats in the U.S. already live indoors most or all of the time. Indoor cats are perfectly happy and can stay fit and active.

YOU CAN PROVIDE AN ENRICHING ENVIRONMENT FOR YOUR CAT BY:

- ✓ playing with them
- ✓ creating an indoor cat garden with cat grass
- ✓ providing a place to perch and scratch such as a cat tree
- ✓ providing enrichment and new things to explore
- ✓ building a catio or walking your cat on a harness

BE A PROUD PROTECTOR OF CATS, WILDLIFE
AND COMMUNITY - **MAKE YOUR CAT AN INDOOR CAT.**
