

## **Above The Sand**

### **Pacific Golden Plover (Kolea)**

I fly to Alaska from Hawaii every summer to nest and have babies.

I fly 3,000 miles in 2 days at a speed of 60 miles per hour.

I can be seen in many different places like grasses, rooftops, trees, and along the shore.

I am mottled color when I arrive in Hawaii in the winter.

I have a black spot on my chest when I leave Hawaii in the summer.
